Sport, made light

Eye-catching, fun and versatile, the SuperSport is a lean road machine that, wherever it is ridden, channels the energy and excitement of sport riding. From weekend roads to everyday roads, from city streets to twisting country highways. With a comfortable riding position, a dry weight of just 184 kg and the impressive performance of the Testastretta 11° engine, every ride becomes an opportunity to indulge your sporting instinct. Wherever, whenever, the SuperSport makes every motorcyclist a real rider: whichever road you take, get ready to experience it as never before.

Sporting flair

The SuperSport has a dynamic, compact and lightweight profile. Its smart design incorporates classic Ducati sports elements, such as the single-sided swingarm, the sculpted tank, and side silencer, which leaves the rear wheel Y-spokes in view. The tapered, tautly designed tail offers the perfect blend of passenger comfort

and sports flair, enhanced even further by the colour-coordinated seat cover that matches and continues the side panel styling. The striking front-on view is characterised by the LED Daytime Running Light (DRL*), , assertively announcing the SuperSport's road presence.

The SuperSport Family

SuperSport is a family of sport road bikes that share the same distinctive performance and versatility. Available in Ducati Red with outstanding standard equipment, the SuperSport interprets the concept with purity and style. The SuperSport S is designed for those who desire the ultimate in sportiness with specific technical equipment. The "S" version is proposed in Ducati Red, as well as in the distinct Star White Silk, with red frame and wheel rims.

Ride in comfort

The ergonomic triangle, specially designed for the SuperSport, provides a comfortable, relaxed riding position - projected slightly forward - that lets riders quickly slip into a sportier position when the pace picks up. A seat height of just 810 mm, and the option of raising or lowering it by fitting an accessory seat, makes the SuperSport accessible to all riders. Passengers will also appreciate the comfortable seat design and the footpegs, positioned at just the right height to prevent leg fatigue. The SuperSport has a riding stance that makes it suitable for urban riding but also a joy on medium-distance journeys, with guaranteed control and effectiveness in sports style riding.

Versatile sports performance

The SuperSport blends comfort with versatility thanks to solutions that make it perfect for everyday road riding - but without ever compromising its sporting spirit. The windscreen (which can be raised by 50 mm to ensure better high-speed airflow protection), side pannier mounts and long-range 16-litre fuel tank give the SuperSport good touring capability. Whichever road you take, the three Riding Modes ensure optimised SuperSport control, while special Sport, Touring and Urban packages mean the bike can be personalised to suit individual tastes and requirements.

Engineered for emotions

The 937 cc Ducati Testastretta 11° offers vigorous power delivery across the rev range and a broad power band: it unleashes 110 hp at 9,000 rpm and a maximum torque of 9.5 kgm at 6,500 rpm, 80% which is already available at 3,000 rpm. Beyond that threshold, the torque curve stays above 90% all the way to 9,000 rpm. A punchy power unit that, thanks to refined electronic control, ensures a reactive easy-to-handle throttle response and maximum riding pleasure.

Precision-designed

The frame of the SuperSport is the latest development of the famous Ducati Trellis design that exploits the engine as a load-bearing element, a configuration that helps achieve a weight in running order of 210 kg. Like a true Ducati sports bike, the SuperSport is equipped with an aluminium single-sided swingarm and fully adjustable suspension, with Marzocchi 43 mm forks at the front and a Sachs monoshock at the rear. The wheels utilize Pirelli Diablo Rosso III tyres, 120/70 ZR 17 at the front and 180/55 ZR 17 at the rear, sizes that combine great handling with an optimised contact patch. The choice of rear tyre, a 1,478 mm wheelbase and a steering geometry with a 24° rake and 91 mm trail give the SuperSport lightness and superlative drop-in performance, maximising stability on corners and at speed. Frame performance is also highlighted by the 48° lean angle, ensuring limitless on-road fun. Completing the outstanding equipment is the responsive, modulated Brembo braking system with monobloc calipers, 320 mm discs and a radial pump in the front, and a 245 mm disc with a 2-piston calliper at the rear.

Full control at your fingertips

Riders have full control via the smartly designed forged aluminium handlebars, mounted on the top yoke, which leave the fork adjusters in view. An array of cutting edge electronics enhances SuperSport performance, optimises control and boosts active safety. The comprehensive, cutting edge control panel provides three Riding Modes - Sport, Touring and Urban - and lets riders customise them to set and adjust Ride-by-Wire, Ducati Quick Shift (DQS) up/down and the ABS and Ducati Traction Control parameters, thus adapting the bike to individual riding styles and changing road conditions.

Ducati Quick Shift

Ducati Quick Shift (DQS) with up/down function is a race-derived electronic system that lets riders change up and down gears, without having to use the clutch or close the throttle. Ducati Quick Shift (DQS) up/down ramps up the excitement of sport riding and lends a valuable helping hand in city traffic or on winding roads requiring frequent gear changes.

S Equipment Even sportier

Designed for those looking for maximum sport performance, the SuperSport S version is even more feisty. The SuperSport "S" version sees the already-complete SuperSport equipment upgraded to provide a passenger seat cover, 48 mm Öhlins TiN-treated forks and an Öhlins monoshock with integrated gas cartridge, both fully adjustable. Ducati Quick Shift (DQS) up/down also comes as standard.

Touring attitude

The SuperSport combines the sporty side of Ducati bikes with the fun and comfort of riding and mid-range touring, allowing you to turn your day trips into journeys lasting a few days. This is thanks to the comfortable riding position, solid aerodynamic protection and the carrying capacity offered by the new 44-litre side panniers that brings out the touring side of the SuperSport. The new side panniers are large enough to carry a standard helmet and have aerodynamic and sporty lines, a demonstration of the attention to design that characterises every Ducati motorcycle.

Servicing and maintenance

La sicurezza è di serie

The continuous work that Ducati carries out in terms of design, research and development serves to ensure cutting edge bikes characterised by maximum active safety levels. A commitment that involves the definition of increasingly advanced technological systems to increase the rider's level of control, such as the Ducati Safety Pack (DSP) which, for the SuperSport, includes ABS and Ducati Traction Control (DTC). Equipment that optimises the bike's dynamic performance in both braking and acceleration and offers numerous levels of adjustment with three different intervention levels for the ABS and eight for the Ducati Traction Control (DTC).

More value to your passion

With Ever Red, the quality and reliability of the Ducati brand remain your inseparable travelling companions over time. Ever Red is the exclusive Ducati warranty extension programme. With its activation you can continue to be protected for 12 or 24 months beyond the expiration of the Ducati Warranty (24 months). Ever Red includes roadside assistance for the entire coverage period and no mileage limits. In this way you can ride as far as you desire, even abroad, enjoying your Ducati worry free.

To find out if the Ever Red extension is available in your country and for further information contact your Ducati dealer or visit ducati.com.

Endless excitement

In designing each bike, Ducati constantly strives to ensure maximum reliability while reducing service costs. A commitment that has seen the intervals for the main Desmo Service, extended to 30,000 km for the SuperSport, in which valve clearance is checked and adjusted if necessary.

Even the simplest of checks, such as the Oil Service, are extended to 15,000 km or 12 months. A considerable interval for such exceptional performance engines, which only confirms the high quality standards adopted in terms of material selection and R&D processes. Ducati continuously invests in the technical training of its dealers.

The specific skills offered by the official Ducati Service network ensure that all those operations needed to keep every Ducati in perfect condition are thoroughly executed, while advanced equipment such as the Ducati Diagnosis System allows the software on each Ducati to be updated with the latest releases, ensuring that the electronics continue to perform at the maximum level.

Always by your side

One of Ducati's main goals is to offer every Ducatista the chance to enjoy unlimited and safe travel all over the world. To achieve this aim, Ducati offers a "fast delivery" original spares service, with delivery in 24/48 hours across 85% of its operating areas. With a distribution network that covers more than 86 countries, thanks to 718 official Dealers and Service Points*, choosing a Ducati means you can travel worry free and in total freedom, wherever the road may take you, and count on support from our extensive Dealer network that ensures Ducati quality and professionalism is always close at hand.

Touring

The SuperSport has also been designed with long-distance travel in mind; the Touring pack lets the rider and passenger remain relaxed and carefree as they ride. Semi-rigid side panniers are incorporated into the SuperSport's design, heated grips and a more protective windscreen ensure outstanding comfort and riding enjoyment.

Urban

Useful and practical: two keywords that sum up the Urban pack. Rider and passenger footpegs with rubber inserts ensure maximum grip even in the rain and with any footwear, while the Small tank bag ensures personal items, such as your smartphone and sunglasses are always conveniently within reach. The Urban pack includes an alarm system to ensure your bike is fully protected.

Riding a motorcycle is the most exciting way to enjoy the road, and offering the utmost safety to the motorcyclist is Ducati's commitment. Ducati bikes are increasingly easy to handle, reliable and better equipped to guarantee maximum safety and enhance riding pleasure. Technical clothing is made with ever more advanced materials for adequate protection and increased visibility. The safety of motorcyclists is Ducati's commitment. For more information visit the safety section of the Ducati site (www.ducati.com).

WARNING: The photos and technical information in this catalogue may refer to prototypes subject to modifications during production and are purely for illustration and reference purposes, and are therefore not binding on Ducati Motor Holding S.p.A. Sole Shareholder Company - Company subject to the direction and coordination of AUDI AG ("Ducati"). Ducati cannot be held responsible for any print and/or translation errors. This catalogue is transnational and therefore some products may not be available and/or their features may vary in accordance with local laws. Not all colours and versions are available in each country. Ducati reserves the right to make changes and improvements to any product without obligation of prior notice or to make such changes to products already sold. Further characteristics of the products are contained in the owner's manuals. The products represented are not definitive versions and are therefore subject to significant changes at Ducati's discretion without prior notice. The photographs published in this catalogue show only professional riders under controlled street conditions. Do not attempt to imitate such riding behaviour as it could be dangerous for you or other people on the road. This catalogue, including but not limited to the trademarks, logos, texts, images, graphics and table of contents herein, constitute Ducati intellectual property, or in any event Ducati has the right to reproduce it; any reproduction, modification or other whole or partial use of the catalogue or its contents, including publication on the Internet without the prior written consent of Ducati, is prohibited.

Actual fuel consumption may vary based on many factors, including but not limited to riding style, maintenance performed, weather conditions, surface characteristics, tyre pressure, load, weight of the rider and the passenger, accessories.

Ducati indicates the dry weight of the motorcycle excluding battery, lubricants and coolants for liquid-cooled models. The weights in running order are considered with all operating fluids and the fuel tank filled to 90% of its useful capacity. For more information visit www.ducati.com. October 2019.
